Innovation Not Imitation Defence By Design

We literally stand behind our products.

We make products that make a difference

Over the past thirty years Civil Defence Supply has provided equipment, training and support to over 37+ countries with repeat contracts in numerous locations due to the exceptional performance of CDS equipment and its training.

As all CDS equipment and training is in current United Kingdom Police, Prisons and Armed Forces use, CDS will continue to innovate and not imitate.

Armadillo Shields are the UK's preferred riot shield and are used daily in over 48 Police forces and Prisons in the UK alone.

CDS manufacture here in the UK and is a proud member of Made In Britain, we always

buy locally and continue to support UK manufacturing where possible.

We also make lots of bespoke items for the emergency services, please get in touch if you need any help with something.

Since 1979

Holding numerous UK and worldwide Patents CDS inventions are innovative and effective. CDS is entirely self-funded by the Bauer family with a massive R&D capability in a wide selection of technologies ranging from advanced battlefield ballistics to chemical devices such as the new Synthetic Pepper-Spray CapTor, which they created, patented and manufacture in their own filling facility. By having a strong engineering and hands-on approach theoretical concepts are rapidly prototyped into working demonstrators.

Why Choose Us?

Civil Defence Supply has been a key partner for many overseas training programs for over 20 years. We only offer the very best in equipment and training.

What we can offer as a training partner

Civil Defence Supply Training includes all forms of tactical deployment based on well-proven methods used for the last twenty five years with well over 450,000 personnel trained world-wide in over 30 countries.

Training tactics and formations is an essential part of modernising any Public Order group or unit. The ARMADILLO Riot Shield offers very high levels of officer protection. By

combining various designs your officers can create a barrier of long shields with short shields with side and top-cover. From that fully-protected formation snatch-squads, tactical units and Less Lethal devices can be launched

Communications by spoken word, radio and hand-signals as well as GOLD, SILVER and BRONZE Command Structure training right up to

Commander level ensures that formations are coordinated into effective tactical elements based on the whole-incident and not isolated parts. CDS delivers the very latest methodology and equipment including front-line video telemetry.

We offer Public Order Training and Control and Restraint Training (prisons/corrections), both physical and policy.

Major Procurements?

We can help you, every step of the way. We have been delivering our products across the globe for over 25 years, our in house team will deal with everything from export licences to logistics.

Source & Supply Service

For over 20 years we have not only manufactured but also sourced and supplied across the globe.

Design & Consultancy

From designing the world famous Armadillo Riot Shield to consulting on major contracts.

In-House Manufacturing

We manufacture all our products here in the UK and are a proud member of Made in Britain.

The Armadillo Interlocking Riot Shields

Designed and manufactured by Civil Defence Supply Ltd in 1985, the Armadillo Interlocking Riot Shield was designed specifically to provide maximum protection in a riot situation. Using its unique interlocking mechanism, front line officers can defend against even the most determined of rioters. The Armadillo Interlocking Riot Shield range is manufactured from only the highest grade polycarbonate, ensuring not only a long service life but unmatched reliability.

In 1996, the Armadillo shield family grew, with the addition of the electric Animal Control Shield (ACS). Designed as a protective aid for dog wardens and police officers, the ACS features a unique metallic grid and transformer, delivering over 50,000V of electricity from a 9V battery. In 2005, Civil Defence Supply introduced Diamond-Ultra polycarbonate to its range. A lexan sheet just 2.5mm thick but with the same protective properties as that of a 3mm or 4mm. Our flagship 6 foot riot shield, made from Diamond-Ultra polycarbonate boasts a weight reduction of 2kg over the standard design; perfect for increased stamina, mobility or the smaller officer.

In 2011, our research and development continues to bring you new products from our world famous brand, including the highly anticipated ballistic Armadillo Interlocking Riot Shield.

Why Choose Armadillo?

Our Armadillo Interlocking Riot Shields are a simple yet very effective protective barrier against nonballistic missile attack, large scale rioting and fire. Comprising of a large front blade, smaller backing panel and adaptable handle configurations, we have a shield for every application.

With both the user and rioter in mind, our shields are designed with many safety and protective features.

For the user, the unique and patented interlocking feature of the Armadillo Shield is one of the many reasons why they are popular the world over. Based on an Ancient Roman design, the Armadillo allows the user to remain protected by interlinking the shield's bevelled edges with other shields to form a protective and ridged barrier from harm.

Safety of the rioter is also an important concern, therefore, all of our shields are fitted with rubber buffers, which mask all anteriorly placed bolt heads for improved public safety.

As well as bricks, wood and other blunt nonballistic projectiles, Armadillos are especially resistant to fire and heat and will maintain their structural integrity up to 180°C. All our Armadillos are SATRA approved, manufactured to the British Standards Specification and the ISO 9002 Quality Assurance Standard for extra peace of mind.

We offer the Armadillo Interlocking Riot Shield in a variety of stocked sizes and configurations. In terms of durability, as only the best materials are used in the manufacture of the Armadillo Interlocking Riot Shield, a lifespan of around three to five years should be expected from normal operational use when stored in suggested conditions.

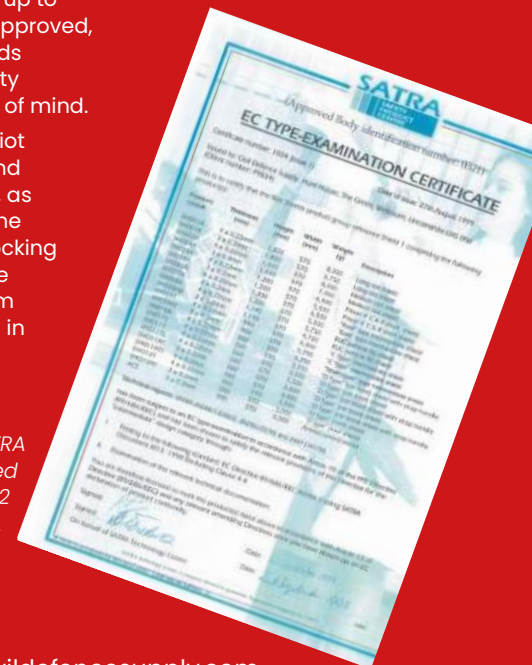

All our shields boast SATRA testing and are manufactured to BSS and ISO9002 standards.

Our patented interlocking design offers unmatched protection in any kind of public order incident

Protective rubber buffers for improved rioter and public safety

LONG RIOT SHIELD

	SH001	SH001A
Height	1829mm	1829mm
Width	570mm	570mm
Blade Thickness	4mm	4mm
Back Panel Thickness	3mm	4mm
Weight	7.5kg	8.5kg
Handle Type	Dolly & Brolly	Dolly & Brolly

Developed as the ultimate long shield for police and prison use.

MEDIUM RIOT SHIELD

	SH002	SH003
Height	1650mm	1650mm
Width	570mm	570mm
Blade Thickness	4mm	3mm
Back Panel Thickness	3mm	3mm
Weight	7kg	6.75kg
Handle Type	Dolly & Brolly	Dolly & Brolly

Developed for use as a barrier shield for UK police forces for street tactics and intervention.

INTERMEDIATE+ SHIELD

	SH006	SH007	SH008
Height	1200mm	1200mm	1145mm
Width	570mm	570mm	570mm
Blade Thickness	4mm	3mm	4mm
Back Panel Thickness	3mm	3mm	3mm
Weight	6kg	5kg	5.5kg
Handle Type	Dolly & Brolly	Dolly & Brolly	Dolly & Brolly

Developed as the ultimate lightweight multipurpose shield for police use, later becoming the most widely used shield in both the UK and worldwide for police and security forces.

INTERMEDIATE SHIELD

	SH009	SH009A	SH010
Height	990mm	990mm	800mm
Width	570mm	570mm	570mm
Blade Thickness	4mm	3mm	3mm
Back Panel Thickness	3mm	3mm	3mm
Weight	5.25kg	5kg	4kg
Handle Type	C Type	C Type	S Type

Developed for police units specifying a very lightweight compact shield for rapid deployment.

PRISON 4' C&R SHORT SHIELD

	SH004	SH005
Height	1200mm	1200mm
Width	570mm	570mm
Blade Thickness	4mm	3mm
Back Panel Thickness	3mm	3mm
Weight	6kg	5kg
Handle Type	C & R Type	C & R Type

Designed originally for the UK Prison Service as the standard overhead cover and cell intervention shield for control and restraint tactics.

SMALL (CAR BOOT) SHIELD

	SH011
Height	560mm
Width	570mm
Blade Thickness	4mm
Back Panel Thickness	3mm
Weight	3.25kg
Handle Type	D Type

The smallest Armadillo available. Developed for use as a rapid intervention shield. Designed to stack on top of other Armadillo riot shields for maximum protection.

SMALL (ROOF) SHIELD

	SH012
Height	560mm
Width	570mm
Blade Thickness	4mm
Back Panel Thickness	3mm
Weight	3.25kg
Handle Type	D Type

Developed for the UK Prison Service for personal protection involving enclosed spaces and roof work.

COMMANDER TYPE SHIELD

	SH014
Height	600mm
Width	570mm
Blade Thickness	3mm
Back Panel Thickness	3mm
Weight	4.2kg
Handle Type	S Type

Developed for the UK Prison Service for personal protection involving enclosed spaces and roof work. It is seen now by many forces as a replacement for the round shield.

ANIMAL CONTROL SHIELD

	SH050
Height	990mm
Width	570mm
Blade Thickness	3mm
Back Panel Thickness	3mm
Weight	6kg
Handle Type	S Type
Voltage	50,000

Developed for UK police units only as a humane method of controlling dogs or other dangerous animals. The Animal Control Shield (ACS) is only for use in operations such as drugs raids, where the officer may encounter a dangerous animal. The operator points the ACS at the animal and presses the red button activating the conductive strips. If the dog touches the strips it will receive a severe non-lethal shock. The strips also generate discharge sparks, accompanied by loud crackling noises, which will deter most animals. For added safety, the shield can only be activated with a specialist key.

ROUND SHIELD

	SH020
Height	660mm
Width	660mm
Blade Thickness	4mm
Back Panel Thickness	N/A
Weight	2.2kg
Handle Type	Loop & Handle

BESPOKE SERVICES

If you have a specific size and configuration in mind that we do not stock, then we do offer a bespoke shield manufacturing service. It could not be more straightforward, simply choose from the options below.

1. Choose the height of your shield blade
2. Choose the width of your shield blade
3. Choose the thickness of your shield blade, (2.5mm, 3mm or 4mm)
4. Choose the thickness of your backing panel, (2.5mm, 3mm or 4mm)
5. Finally choose your handle configuration

Dolly & Brolley Handles
These are our standard handles on our larger Armadillo shields.

S-Type Handles

These are our specialist large loop handles for our medium to small Armadillo shields.

C-Type Handles

Offer the user a similar holding position as the Dolly & Brolley but is more compact for rapid deployment.

D-Type Handles

These are our standard handles on our smaller Armadillo shields.

C&R Handles

These handles were designed for Control & Restraint purposes for medium to large shields used in restricted spaces.

SHIELD LIGHT

A wider beam angle provides panoramic lighting and immediate situation assessment so that you can see and respond faster. This is helpful in close quarters (hallways and doorways).

Our shield lights are fully waterproof, fire-resistant, impact-resistant and can be used in all-weather situations. Shield light delivers a blinding 650 lumens of light.

Recharge the lithium-ion Quick Swap with Micro USB charger (included).

Lumens	650 Lumens
Battery Life	1 - 1.75 hours
Power Source	Rechargeable Battery Pack
Modes	2 (Continuous On, Turbo-Strobe™)
Weight	7.3oz (206g) with Power Pack and Light Head 2.4oz (69g) Power Pack
Dimensions	2.6" x 2.4" x 3.8" (66 x 60 x 97mm)
Certifications	CE
Ingress Protection	IPX7
Fire Resistant	Meets NFPA 1971-8.6 (2013) Requirements
Waterproof	65 ft (20 m)
Impact Resistant	9.8 ft (3 m)
LED Colour	White
Colour Temperature	5700K
Operating Temperature	14°F (-10°C) to 300°F (149°C)
Features	Two intensities Mounted to the inside of the shield, it prevents the light from being grabbed by the opposing force

Dragon Lights Portable Lighting

Based in Lincoln, UK, the Dragon brand was founded in 1978 and has become a leader in searchlight equipment. Dragon Lights, including the Delta, T12 and Max are used globally by the Police, Fire services and the UK Ministry of Defence.

Constructed to the highest standard and fully guaranteed, Dragon Lights are developed using heavy-duty wiring and aerospace standard connections. Dragon Lights are amongst the most durable portable lights in the UK and throughout the world.

The Dragon name is a byword for quality and reliability and we maintain this throughout our services. We pride ourselves on excellent customer service, meaning you will never speak to a machine or a call centre. Most importantly, all our lights are made right here in the UK.

CapTor

Advanced Incapcitant

In 2008 Civil Defence Supply began new scientific work programme to create an entirely non-flammable product **CapTor** due to the increasing deployment of CEW's. **CapTor/360** has now completely replaced the original irritant sprays known as PAVA Sprays. As CapTor only affects the eyes giving a blinding sensation for a short duration with **no cross-contamination** problems or the need for medical intervention the in-use costs are vastly lower than those for CS and other cross-contaminating or flammable products.

Civil Defence Supply had created an entirely new chemical formulation using an ultra-low 0.3% concentration of a specific chemical in 99.7% safe solvent that gave all the necessary eye-blinding properties required and no undesirable after-effects or cross-contamination.

In 2022 Civil Defence Supply was asked if Captor could ever be Halal, so working and information sharing with the UK muslim council its was concluded that Captor does qualify as Halal and In 2022 Captor was certified by the UK Muslim council as a Halal.

KEY POINTS

- CapTor Irritants are fully Halal Approved as of August 2022
- Other Irritant sprays in the market can contain as much as 20% Isopropyl Alcohol (Also known as rubbing alcohol, which was used throughout the pandemic to kill Covid-19)
- Home Office CAST-DSTL 23/14 standard approved - See attached 5 Year Certification
- CapTor Irritants are completely non-flammable and 100%CEW safe
- Civil Defence Supply did not change the size of the CapTor canisters and they will continue to fit all existing CapTor accessories - Cabinets, Holsters and pouches.
- Unlike other Irritants in the market, CapTor is manufactured here in the UK by Civil Defence Supply and is unaffected by global supply chain difficulties.
- Serial Numbered, Force Identified, batch-coded and expiry dated - Four-year shelf life
- Made in Britain member, supporting UK manufacturing where possible
- CapTor medical data, including deep lung & Asthma research, is not relevant to any other irritant product.
- CapTor irritant formulation is 100% food grade and offers only a trace amount of alcohol content. this has many benefits such as being CEW safe, not affecting breathalyzer readings and being able to be used in confined spaces, such as custody cells, the Underground, shops, vehicles etc.
- **Competitors cannot offer the same non-flammable, Halal formula because of Civil Defence Supply's Patents.**
- In 2018 Civil Defence Supply listening to the UK Police feedback created their new CapTor 360 which has passed Home Office 23/14 Certification alongside re-certification of CapTor 2.

Thank you for supporting British Manufacturing throughout these uncertain times

In order to train officers how to correctly use P.A.V.A., we offer a very user friendly training system which involves inert cans. These cans are filled with de-ionised water and behave and feel exactly like that of a P.A.V.A. can. The system is called the "Clip-Cap" system as the caps on the cans are reusable. This means the user only needs to replace the actual can unit, ensuring costs are kept to a minimum.

For more information on our fantastic product, please contact a member of our sales team.

P175 THE ULTIMATE CHEMICAL SPRAY HOLDER

Made from high quality leather and durable nylon mouldings, the P175 spray holder provides essential PROTECTION—COMFORT—PRECISION for non-lethal sprays. Designed and developed with the assistance of operational and training personnel, our innovative range of spray holders addresses the difficulties experienced with conventional pouches. Acknowledged by police forces around the world as one of the fastest, most effective means of delivering non-lethal sprays, P175 ensures your advantage in times of need.

- Canister protection
- Lanyard security
- Right/left hand preference
- Ease and speed of withdrawal/relocation
- Positive hand grip
- Directional control
- Adjustable carriage
- Choice of spray type
- Choice of belt loop size
- Detachable for secure storage
- Withstands decontamination processes
- For use with both OC or CS sprays

PREPARE FOR DARK TIMES !

Upgrade your existing DRAGON MAX with the latest technology NEW LED ARRAY

DRAGON portable floodlight
MAX LED

Quadruple the light output of your existing Dragon MAX by fitting a brand new high tech LED upgrade pack.

120 ultra high power Cree LED s are mounted in a computer designed array which fits perfectly in your MAX with the minimum of modifications.

We fit the array, any connectors required and a new lens to massively increase your lighting capability.

The array uses half the power of the fluorescent unit so your present battery will run for over 12 hours.

Double
run time to

12
hours

4x

- **100,000 hour life**
- **No Heat**

DRAGON portable floodlight
DELTA
DUOBEAM LED

The DRAGON DELTA DUOBEAM SPOT/ FLOOD combines 2 LED arrays in one unit, giving the user a clean white powerful long - range spot-lamp and a super wide flood, both running at the same time!

State of the art L.E.D. technology is allied to a trusted design to make a rugged & versatile search & utility lamp.

6 individual L.E.D.s produce an intense spot beam of bright white light, equivalent to 120,000 candle power, and 8 more L.E.D.'s simultaneously provide the floodlight.

This combination makes for the

perfect portable general purpose spot lamp.

L.E.D.'s draw considerably less power than halogen bulbs, coupled with 2 electronically controlled power modes.

The new Delta DUOBEAM lasts over 2 hours on high power and 4 hours on low, no mean feat for such a powerful searchlight.

Colours Available

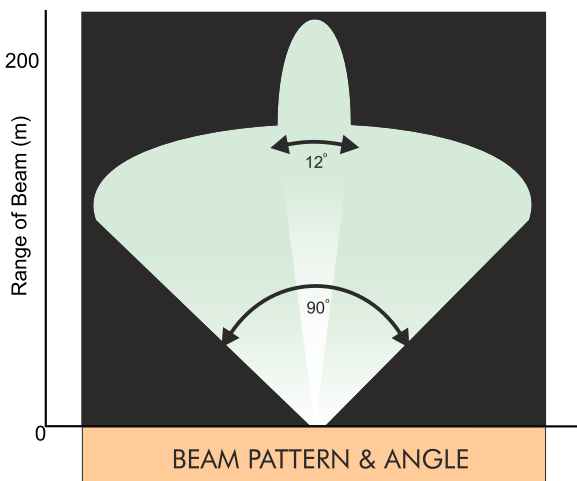

SPOT & FLOOD IN ONE LAMP
The Ultimate Searchlight

Universal Ni-cad battery pack can be changed in seconds. Pack can be charged on or off the lamp unit.

DELTA

Thanks to its rugged, lightweight design, the Dragon Delta is used by police and emergency services worldwide and offers the user a very professional lighting solution at an affordable price. Durable, robust and easily maintained, the Dragon Delta Classic is suitable for even the most demanding of users.

The Dragon Delta Classic is dual powered with both SOW and 2OW discharge settings, providing both a powerful long and economical short range mode. Switched to the SOW setting, the Dragon Delta emits 160,000 candle power at a range of 700m. Where economy is a priority, the 2OW setting allows the Dragon Delta to run continuously for up to 3 hours.

Currently, the Dragon Delta is widely used amongst the following professions and users:

- Building Tradesmen
- Security
- Mechanics
- Farmers

T12

The Dragon T12 Classic is the most powerful halogen searchlight in our range. Using a 1 00W sealed beam unit, the T12 produces 200,000 candle power with a range of up to 800m. The Dragon T12 was initially designed for use with IR filters as our particular design ensures that both high amounts of visible and non-visible (IR) light are produced. However, the Dragon T12 also functions as a very powerful standalone searchlight, very popular with the MOD, farmers and security services.

Helmets

ARGUS[®]

ARGUS 017 PUBLIC ORDER HELMET

The Argus 017 Public Order Helmet is a robust, safe and reliable helmet that has been manufactured and tested to meet recognized standards. It has been specifically designed for the rigorous operational requirements of public order and security duties.

KEY FEATURES

- Approved to BS PAS017:1995 (Amendment 1)
- Manufactured in both ABS and GRP materials
- High impact resistant polycarbonate visors, with anti-mist and anti-scratch coating available
- Adjustable chin strap with chin cup and quick release facility
- Liquid and flame resistant, metal gauze audio apertures to enable local commands to be heard
- Ability to wear a range of full face respirators
- Ability to fit variety of radio communication devices
- Available in a wide range of head sizes

SPECIFICATIONS

Improved Impact Test Method

Improved impact test method using 'dropping headform' equipment and a greater area of testing on the helmet. Testing is carried out for both shock absorption and penetration.

High Energy Penetration Protection

Increased energy applied during penetration testing of the helmet - metal striker with a 3kg mass dropping from 2 meters.

Simulated Weather Conditioning

Testing carried out after conditioning the test helmets at +50c or -20c for between four and twenty four hours.

Ultra Violet Conditioning

Subjected to water spray for up to 24 hours, followed by ultra-violet conditioning for 400 hours prior to impact and penetration testing - simulates sunlight and weather factors.

ULTIMATE HINGED HANDCUFF

Ultimate Hinged Handcuff BLACK

RIGID HANDCUFFS SPEEDCUFFS

Total control rigid handcuffs have a moulded grip that fits snugly in the hand and provides greater control with speed of application.

Rigid Handcuffs possess the following features:

- 3 independently moving ratchet bars, with 6 teeth on each bar. The total of 18 teeth provides 25 locking positions and 17% larger internal circumference than standard models
- Rotating arm backloads for speedcuffing
- Precision engineering ensures rotating arm swings through the handcuff, engaging the ratchet bars every time
- Double locking mechanism
- Two standard keys are provided with each Handcuff
- Full Compliance with N.I.J Standard 0307.01

ULTIMATE FOLDING HANDCUFFS

- 3 independently moving ratchet bars
- Models 850 and 850B:
 - 6 teeth on each bar
 - locking positions – 25
- Models 852 and 852B:
 - 4 teeth on each bar
 - locking positions – 23
- 17% larger internal circumference than standard models
- Rotating arm backloads for speed cuffing
- Precision engineering ensures rotating arm swings through the handcuff, engaging the ratchet bars every time
- Double locking mechanism
- Two standard keys are provided with each Handcuff
- Full Compliance with the strength requirements of N.I.J Standard 0307.01
